

Elijah Matter

This is me!! 🐼🐼

★ What major and career am I looking for?

Currently I am majoring in Business Information Systems. I have two minors as well, Cybersecurity and Political Science. I am hoping to go into the cyber world once I graduate, maybe working for the government or a private company.

★ What is my technical background?

While I have no specific qualifications, I think I am above average when it comes to using computers. I've been on the internet/using technology since a very young age, so I know more than average. But if you ask me to run Linux on my computer, I would be a little lost initially. I know how to use words, excel, and all those types of programs. I also have a little bit of coding knowledge on top of that, but nothing too extreme. That's why I am at college after all. I can also customize computers with special plug ins and what not to make them more accessible and look cooler if that counts for anything.

★ What are some non-technical aspects of me?

My father was in the military, so I have been all over, but I grew up in Fallon, Nevada. It's an hour out from Reno, a very small town with not a lot to do. I chose the University of Nevada Reno because it's a nearby family while still giving me independence from them. Some of my favorite hobbies are photography, working out, reading, and playing games. I do want to pick up guitar and martial arts in the future, however, preferably boxing. My favorite genre of music is punk/alt with some of current favorite artists are Inuday and Loveshy. Although I listen to a lot more. (some photos I took in 2025, had to shrink to meet page requirements, I have a lot more photos though)
